Task Title: Writing Lego Building Instructions

Learner information and instructions:

For this activity you will be writing building directions for someone else to use to re-create the object that you have designed. They will not know what the final object should look like. You will also be following their directions on how to build something.

Task 1: Decide what type of object you want to build with your bag of building pieces (Lego). It will be an abstract version of the object (meaning not very much detail). It could be something like a bridge, animal, house, etc. You must use all of the pieces.

Task 2: Start building your object, writing down the step-by-step instructions as you go. Do not include any hints about your object in the instructions. For instance, write "Place red blocks around outside edge of the flat green piece" and **not** "use the red blocks for the walls of the house".

When your instructions are complete, take your object apart. Put all of the blocks and your instructions back in the bag.

Task 3: Trade bags with someone else. Using the instructions they have written, try to rebuild their object. What is the object?

Task 4: When both you & your partner have finished, look at each other's completed objects. Talk about what was clear in the written instructions and how they could be improved.

Task 5: Re-write your instructions to be more clear and easy to follow.
